

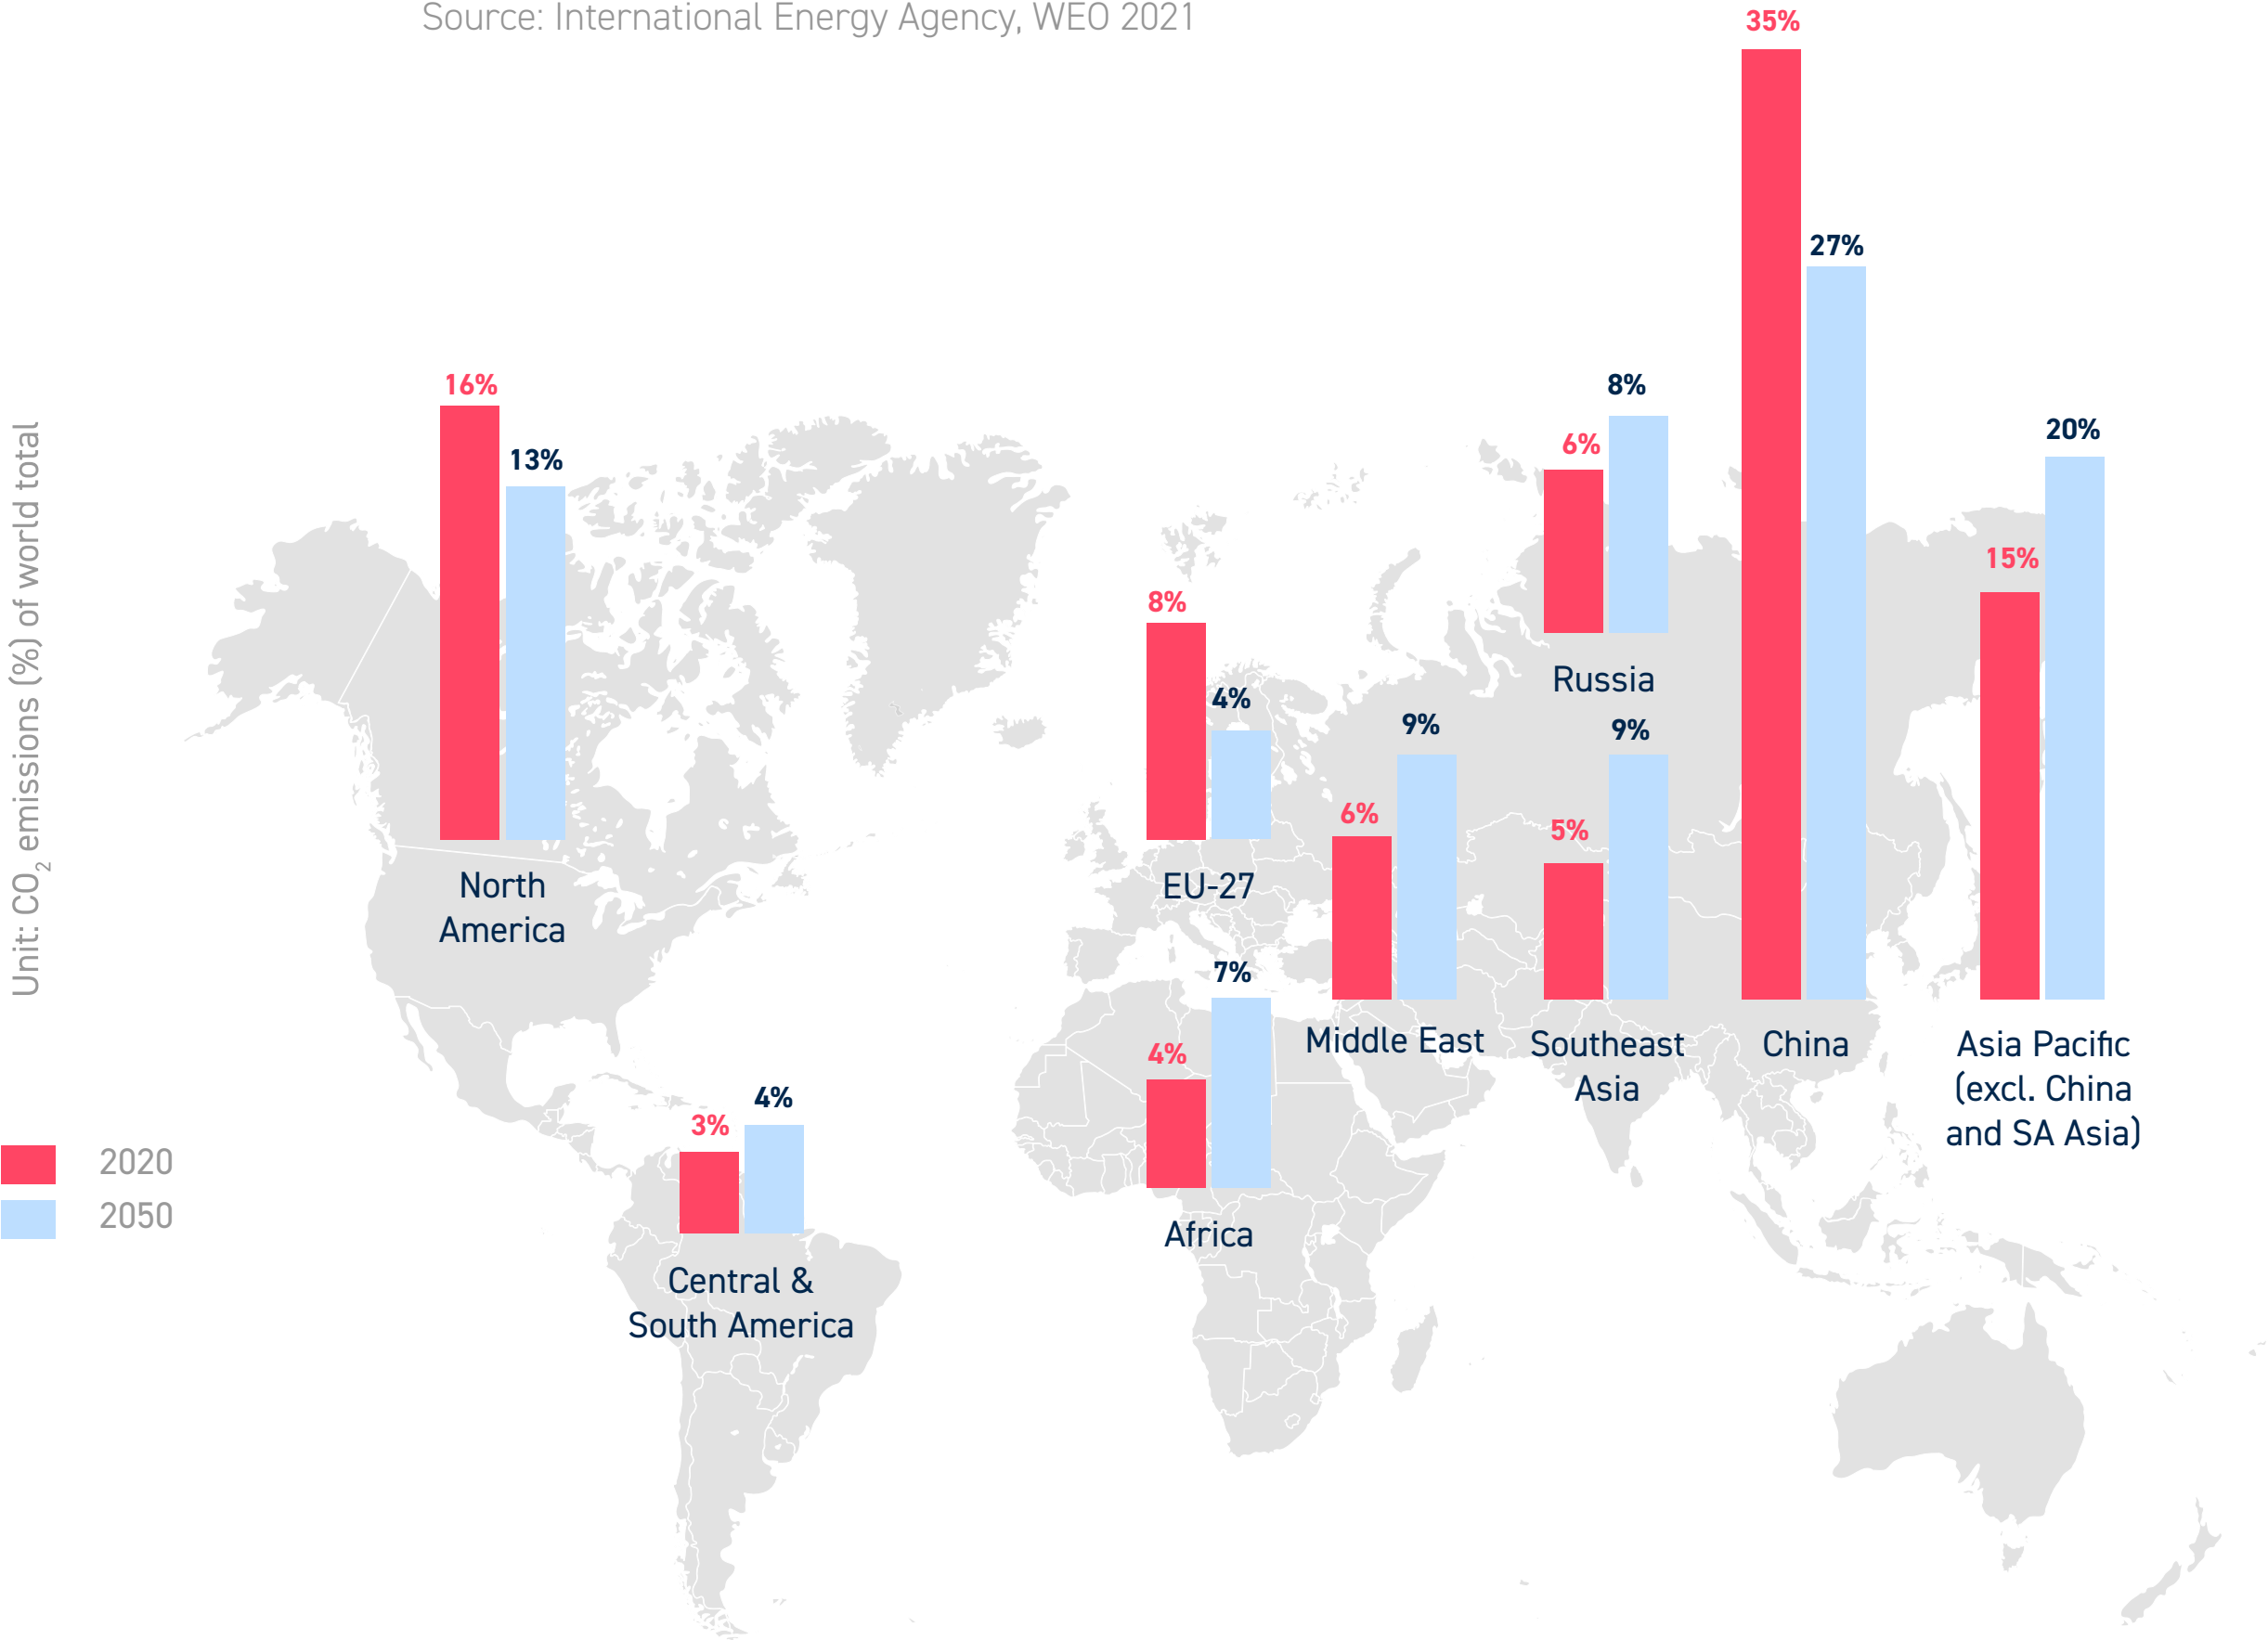

FIG.46

DECLINING EU SHARE IN GLOBAL CO₂ EMISSIONS

Source: International Energy Agency, WEO 2021

In 2020, the EU accounted for 8% of the total global CO₂ emissions and this share is expected to reduce to 4% by 2050. CO₂ emissions in North America and China are also forecasted to decrease by 2050 by respectively 3 and 8 percent points, whereas in the other parts of the world, emissions are likely to increase.
