

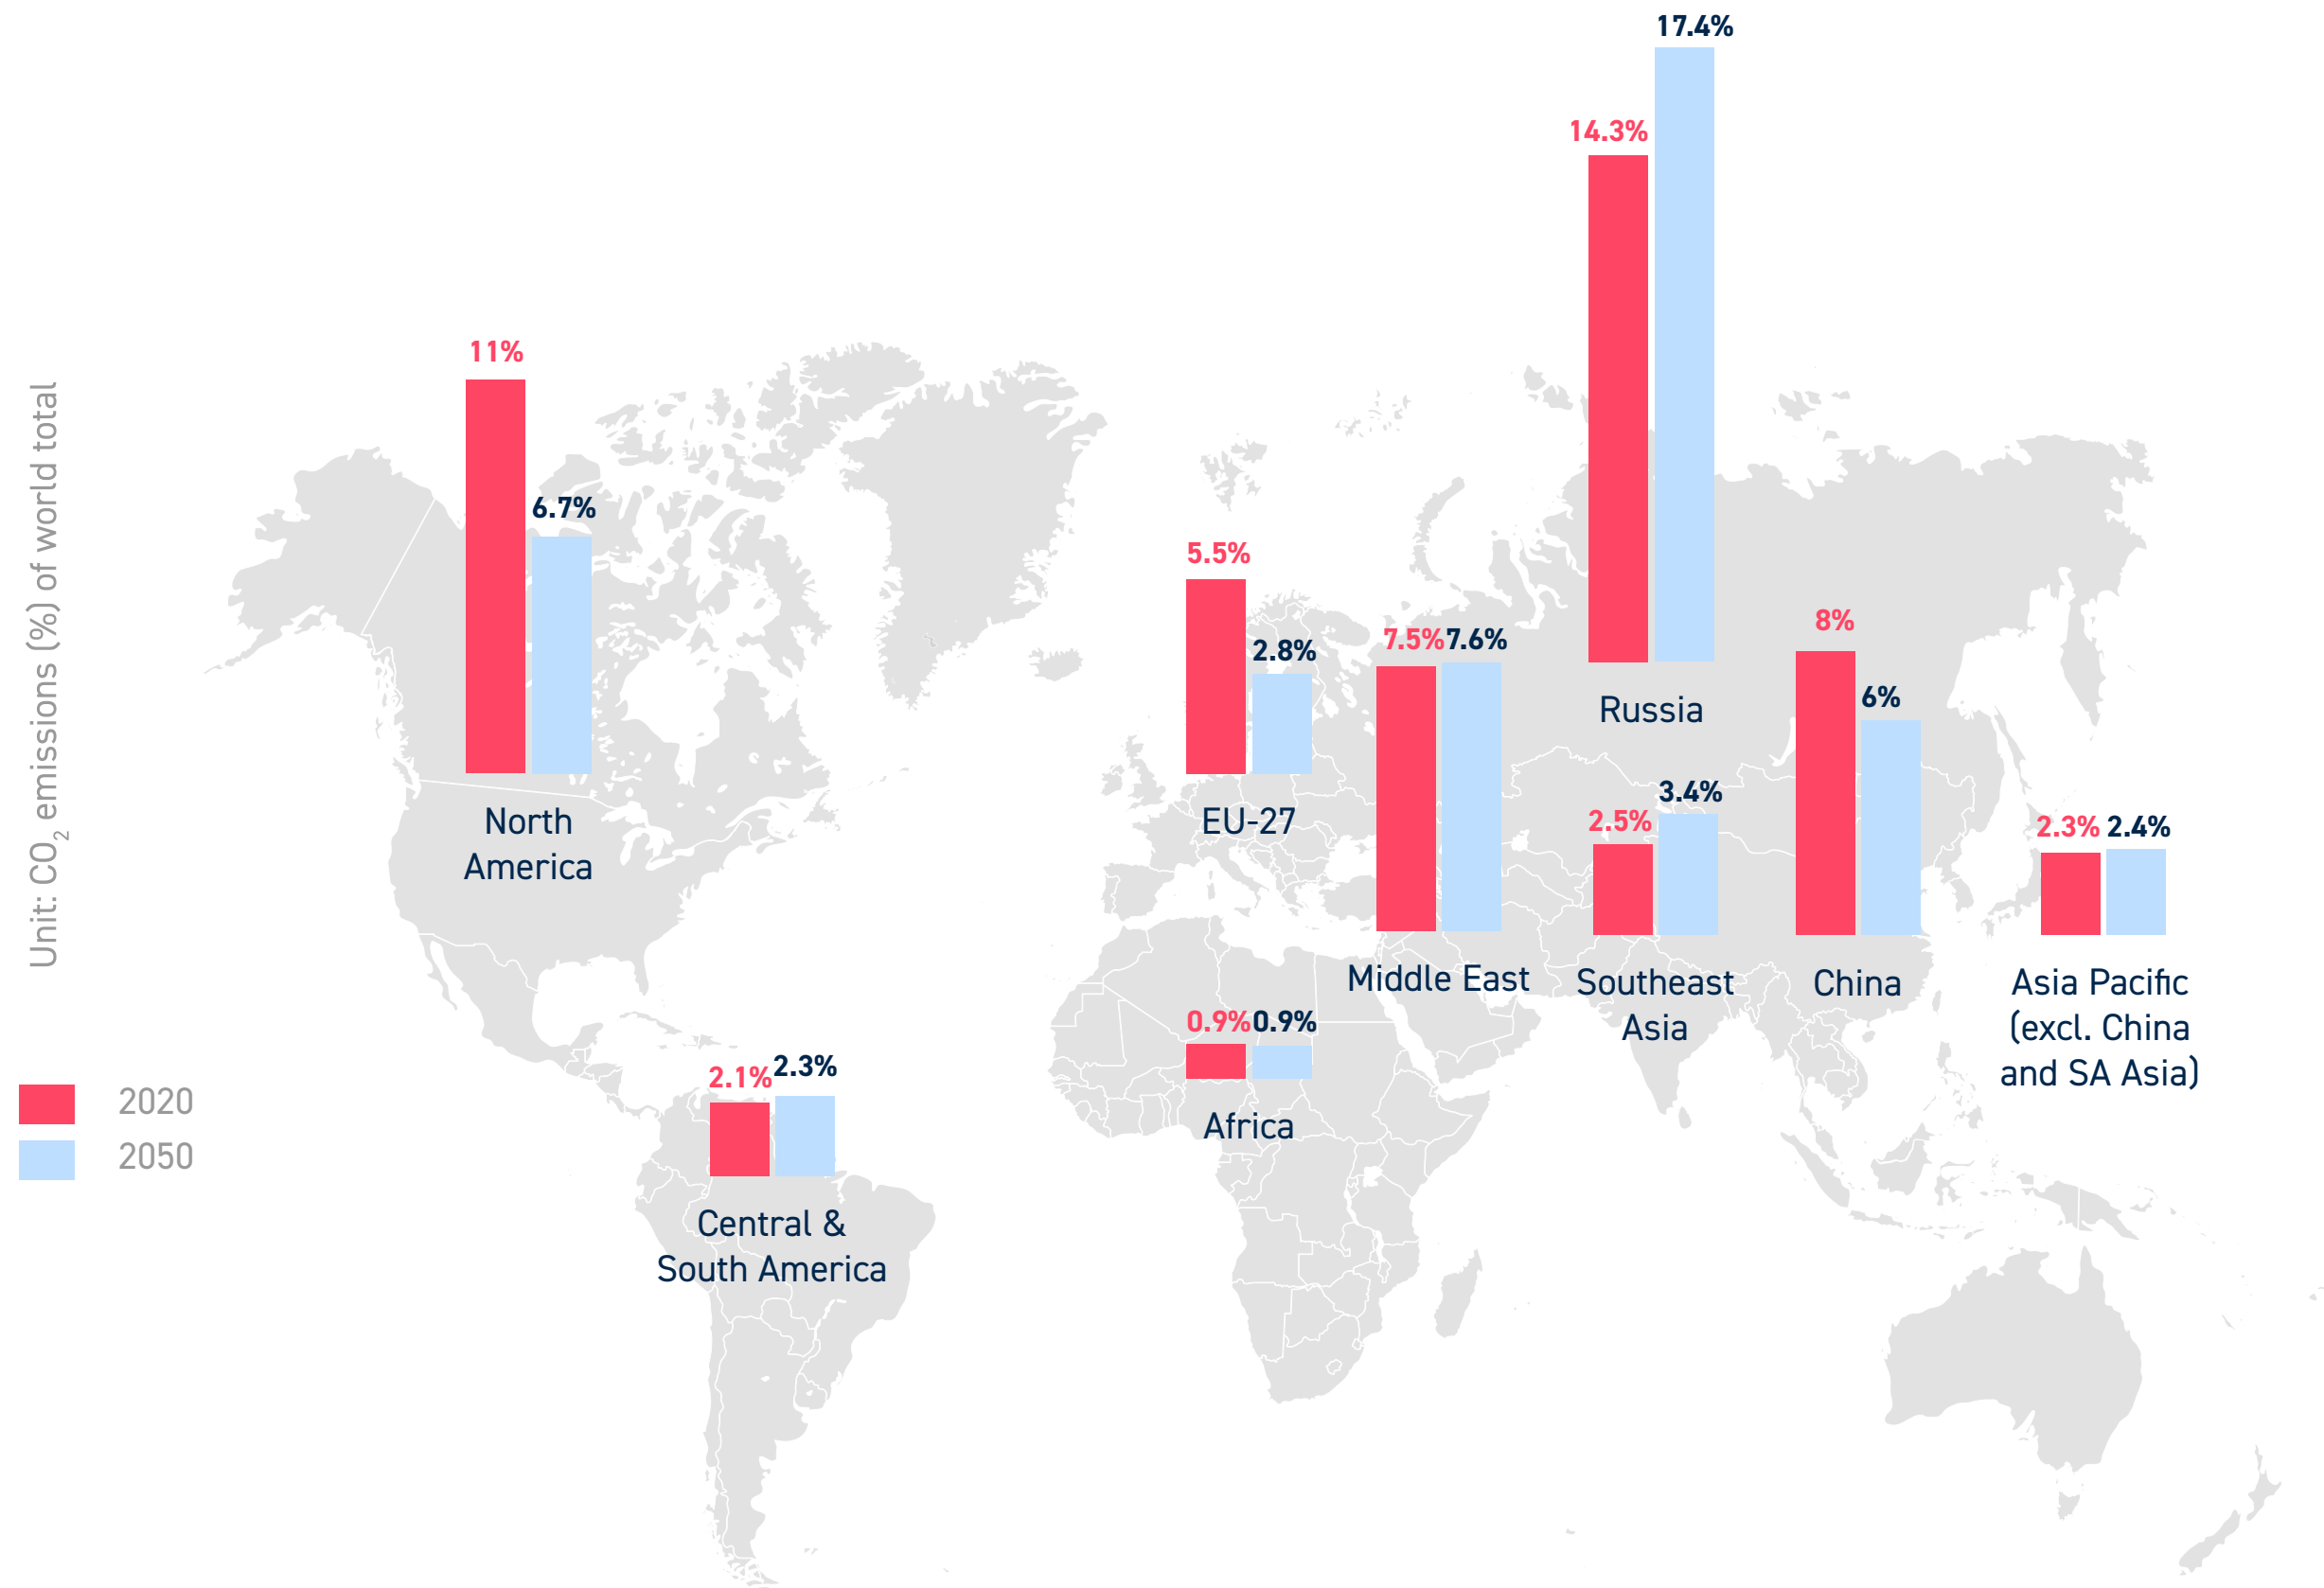

FIG.47

# CO<sub>2</sub> EMISSIONS PER CAPITA/REGIONS

Source: International Energy Agency, WEO 2021

All regions but Russia and Southeast Asia are forecasted to see a decrease in CO<sub>2</sub> emissions by 2050. The drop is especially notable in the EU-27 and North American, where CO<sub>2</sub> emissions per capita are estimated to decreased by 49% and 40%.
