AVERAGE AGE OF EU-27 CAR FLEETS IN 2023

Source: European Automobile Manufacturers' Association

The average age of vehicle fleets varies across European countries, from 8 years in Luxembourg to 17.5 years in Greece, with an EU average of around 13 years. In Eastern and Southern Europe, where citizens cannot necessarily afford to buy new vehicles and depend on the second-hand car market, passenger cars will stay on the road longer and will need solutions for decarbonisation.
