

## FuelsEurope Statement on the European Commission's Green Deal

The Commission's Green Deal published today is an important development for Europe. It will require a proactive and determined engagement of all sectors of the economy and an effective dialogue between industry and regulators to deploy the most efficient and effective low-carbon technologies.

FuelsEurope believes that its Vision 2050 is an important contribution including critical technologies and industrial solutions that could achieve carbon-neutrality in mobility and in the industrial value chain.

### FuelsEurope, the voice of the European petroleum refining industry

FuelsEurope represents with the EU institutions the interest of 40 companies operating refineries in the EU. Members account for almost 100% of EU petroleum refining capacity and more than 75% of EU motor fuel retail sales.

FuelsEurope aims to promote economically and environmentally sustainable refining, supply and use of petroleum products in the EU, by providing input and expert advice to the EU institutions, Member State Governments and the wider community and thus contributing in a constructive and pro-active way to the development and implementation of EU policies and regulations.
