## FIG.1 FUEL TAXES MAKE A SIGNIFICANT

## CONTRIBUTION TO MEMBER STATE NATIONAL INCOME

Source: Eurostat and European Commission

Taxes on fuels contribute on average to some 6% of Member State tax revenue in 2018. This significant contribution to Member State revenue has to be put in perspective with the subsidies given to many competing alternatives to oil. This demonstrates that replacing petroleum products by these alternatives would have severe consequences for Member States' income.

Country		Total Fuel Revenue in €	Share
SI	Slovenia	1 713 816	10%
EE	Estonia	843 860	10%
ВG	Bulgaria	1 578 675	9%
