

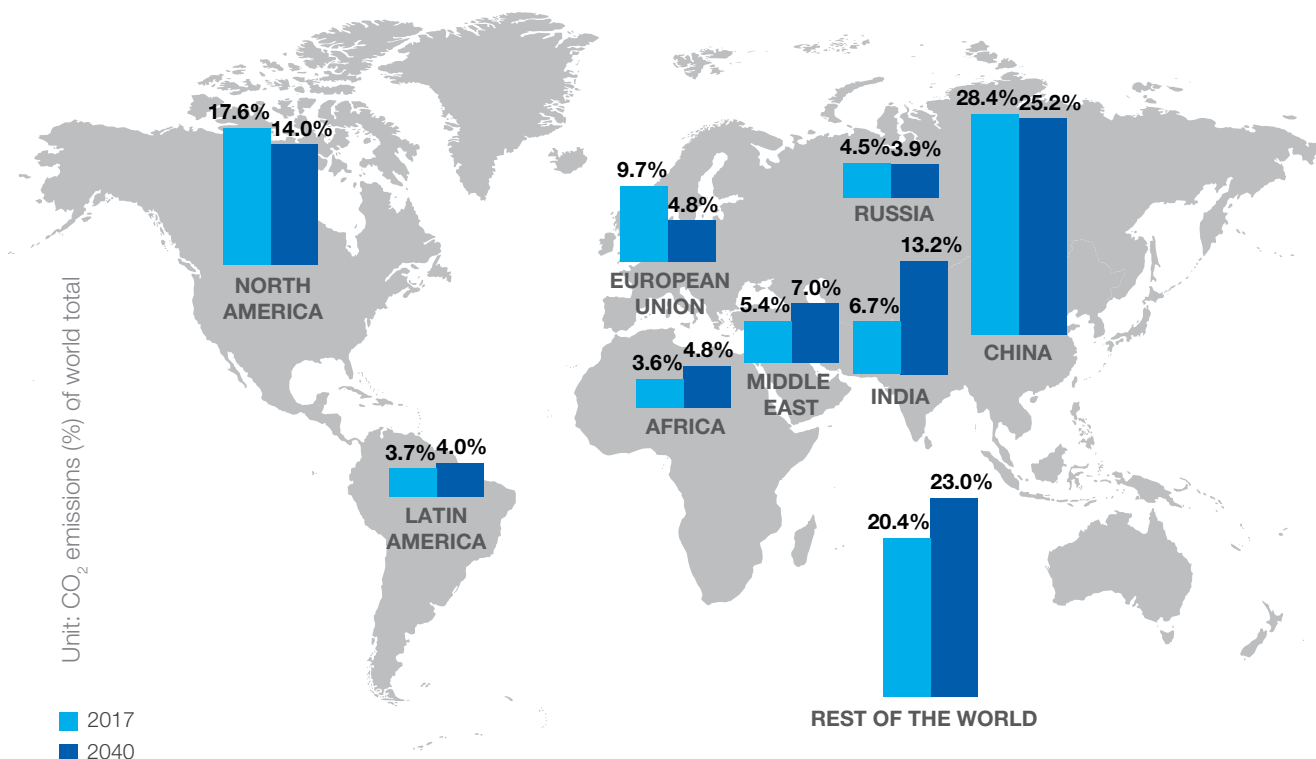

FIG.42 PROJECTED DECLINING EU SHARE IN GLOBAL CO₂ EMISSIONS

Source: International Energy Agency, WEO 2018

In 2017, the EU accounted for 9.7% of the global CO₂ emissions and this share is expected to be reduced to 4.8% by 2040. According to IEA, CO₂ emissions in North

America, Russia and China are also forecasted to decrease by 2040 where in other parts of the world emissions will likely increase.
