

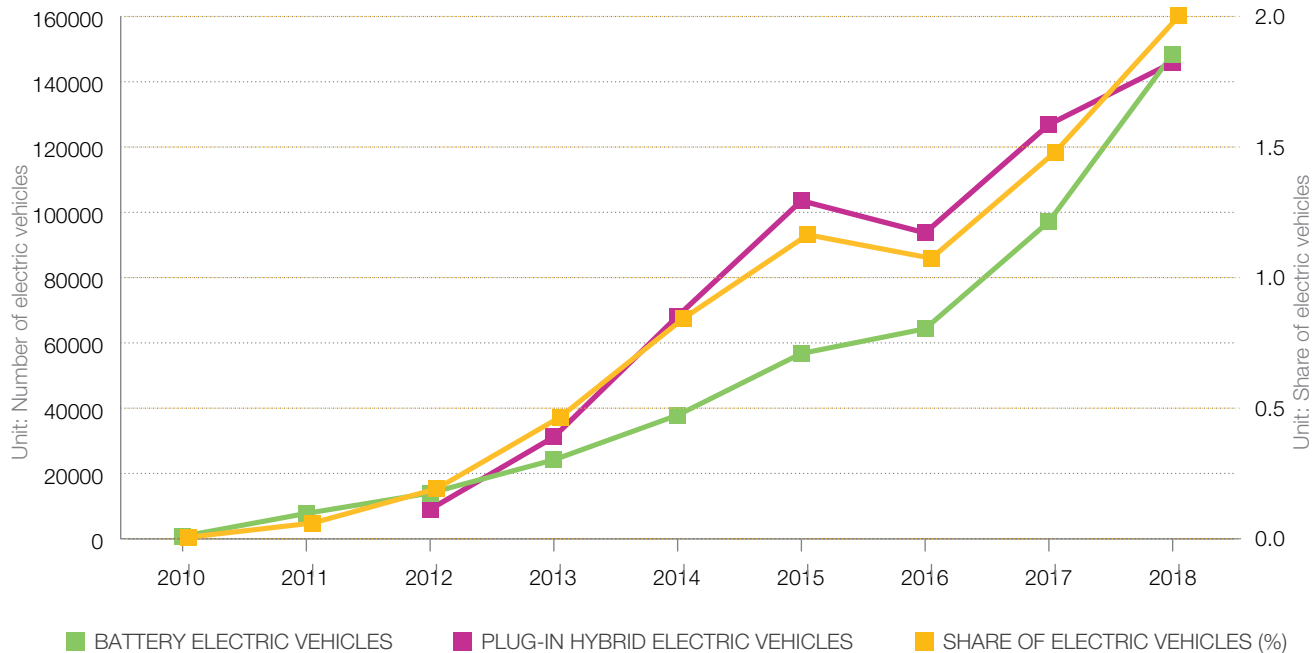

## FIG.46 ELECTRIC VEHICLES AS A PROPORTION OF THE TOTAL FLEET IN THE EU-28

Source: European Environment Agency

Electric cars are slowly penetrating the EU market. These include Battery Electric Vehicles (BEV) and Plug-in Hybrid Electric Vehicles (PHEV). While the numbers are still low (about 300 000) and their market share is about 2% of new

registered passenger vehicles, the number of new electric car registrations in the EU has been increasing steadily over the last few years.
