

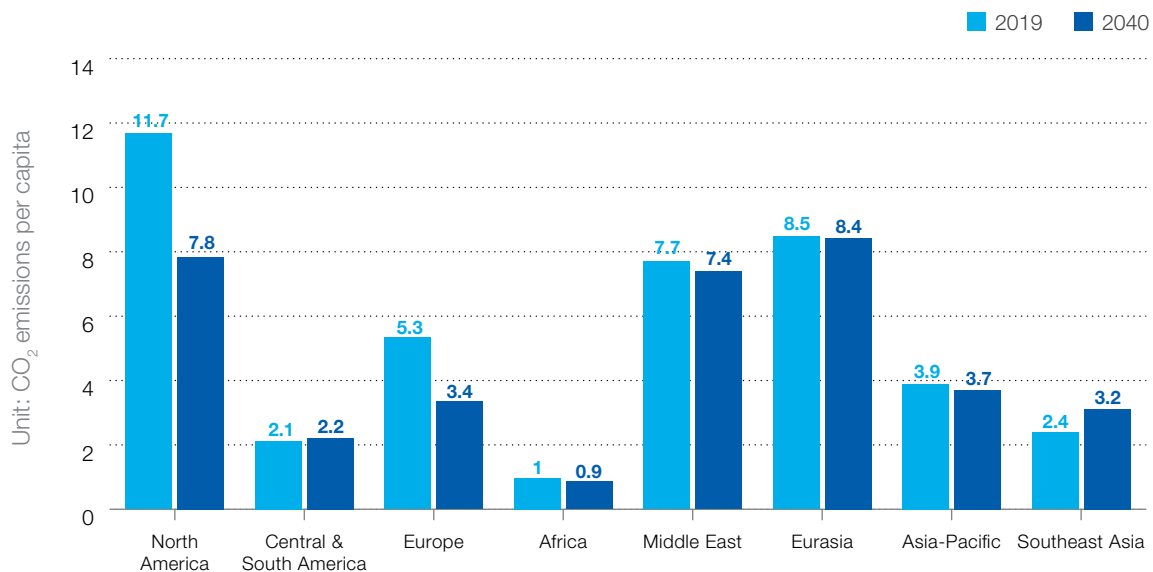

## FIG.42 PROJECTED CO<sub>2</sub> EMISSIONS PER CAPITA/REGIONS

Source: International Energy Agency, WEO 2020

All regions but Eurasia and Southeast Asia are expected to see a decrease in CO<sub>2</sub> emissions by 2040. The drop is especially notable in North America, where CO<sub>2</sub> emissions

are estimated to be reduced by nearly 4 million tonnes by 2040 while in Europe, a decrease of 2 million tonnes is foreseen.
