

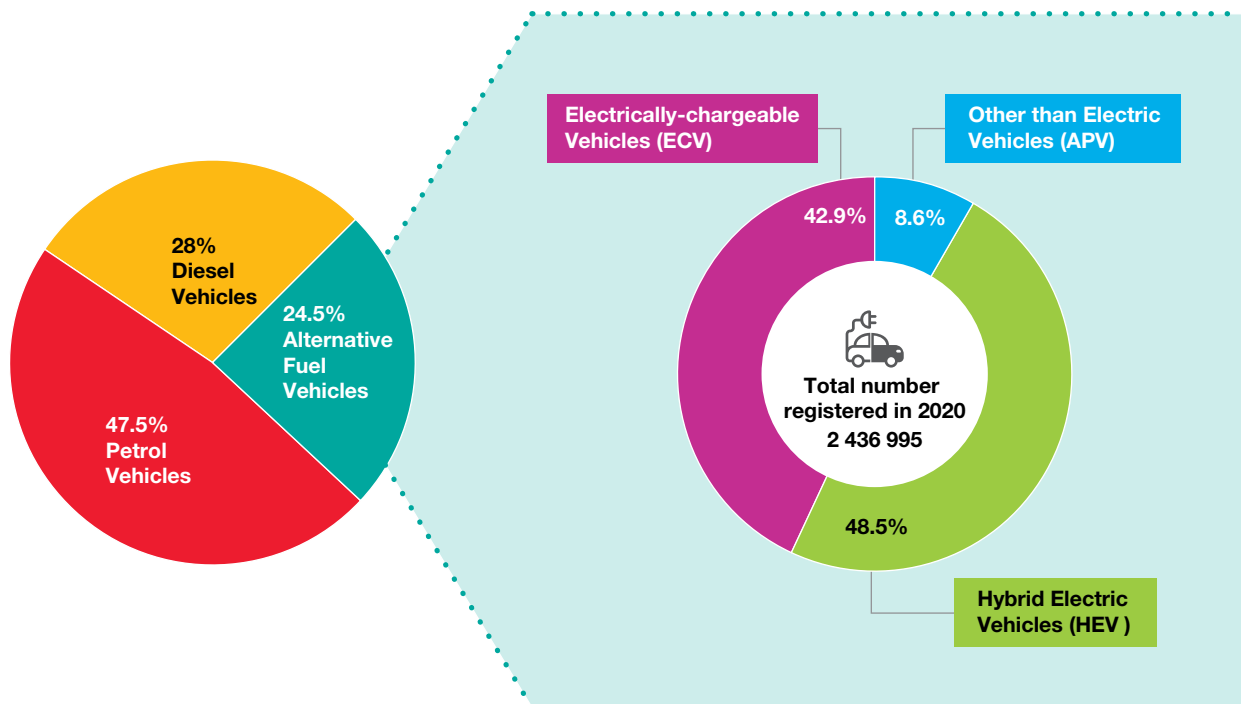

## FIG.44 ALTERNATIVELY FUELLED VEHICLES ACCOUNTED FOR 25% OF TOTAL PASSENGER CAR REGISTRATIONS IN THE EU-27 IN 2020

Source: ACEA

Although the decline of 3 million units in car registrations resulting from COVID-19 hit diesel and petrol-powered vehicles the hardest, conventional fuel types still dominated EU car sales in terms of market share (75.5%) in 2020. Alternatively fuelled vehicles accounted for 25% of the total passenger car sales across the EU, a significant increase from 2019 to 2020 (11% to 25%, respectively). Stimulus packages introduced by governments to boost demand,

following the unprecedented impact of COVID-19 on car sales, sought to stimulate alternatively-powered vehicles in particular, further driving demand for low and zero-emission cars.

**Note:** Please note that due to rounding, figures may not add up exactly to 100%.
